Windows 環境下啟動 Stunnel 與 Fossil SCM (./2017spring-stunnel-fossil.html)

說明如何在 Windows 操作系統中, 利用 batch 檔案取得電腦連外 IP, 並且設定 Stunnel 後與 Fossil SCM server 配合 啟動.

以下使用 Spring 2017 1GB (http://service.mde.tw/public/tiny2017_1GB.7z) 版本的隨身程式系統, 修改 start.bat 如下後, 可以自動取得電腦連外 IPv4 IP 位址, 並將設定資料寫入 stunnel.conf 後啟動.
